- [2DVD](#)

Flight Date:

Wednesday, May 18, 2011

Status:

Green

All 5 NASA 2DVDs are currently collecting data.

Due to the constant adjusting of video signals, 2, 4, and 6 mm spheres were dropped to check the calibration. It was determined each of these units required a plane test.

SN\_35: Calibrated last night via plane test - calibration looks good.

SN\_37: Calibrated last night via plane test - calibration looks ok.

SN\_25: Calibrated last night via plane test - calibration looks bad.

Calibrated today via plane test - calibration looks bad.

A corr fact data set will need to be collected for SN\_25. Data will be reprocessed once this is done.
